Subject: Fw: Gulfco sampling data
Date: 09/15/2008 03:50 PM

B,

Louise D. just called & said she does have a copy of the site data CD. Here is the email on what site data to include in the comparison to the generator data. A short summary of what the results represent (or how they were developed) should also be included.

Thanks,

Gary Miller

Subject Re: Gulfco sampling data 

Barbara,

The file is the Access database file, which is named ***December 2007 Gulfco Validated Database.mdb***. It has all of the Gulfco sample results through December 2007. The records that should be reviewed for a match to the generators chemicals have the following field entries:

- **Test Type Code** - "Site"
- **Laboratory Qualifiers** - everything except a "U" entry
- **Unit** - "mg/kg" or "mg/L"

The chemical names are listed in the "**Parameter**" field.

Regards,

Gary Miller

Subject Gulfco sampling data

Gary

Patrice is getting ready to task our Gulfco analysis on possible generators.

I gave her a copy of the CD you gave me with the sampling results. There are eight files on the CD. Can you take a look at it and note which file(s) the contractors should use to do their analysis? (which file(s) have the COC listed?)
